

## *Meeting Minutes 4*

---

Date: 10/4/11

Advisor Meeting: 3:45pm

- Discussed asking GE for old compressor data we could use to simulate and test our design
- Reviewed questions to ask GE and added some:
  - o Frequency of data transmission of sensors already present?
  - o What sensors are already present and what sensors do we need to add?
  - o Indexing to look for old data stored by app? Search engine?
  - o
- Budget is \$2,000
- Trevor has begun to make a story board for the mobile app
- Will get feedback from Todd after story board is complete
- Was advised to send a summary of any meeting with GE to Todd and thank him for his time
- Start building knowledge base of what errors could go wrong with a compressor and what data would help predict/identify such errors
- Dr. Debrunner has provided team with a Beagle Board and Luis will begin to program and see if it will be the one we will eventually purchase for the project

End Time: 4:30
