

Coordinator Meeting 10/17/2013

Attendance

Chris Proffett

Seth Norman

Matt Boler

Kevin Flemming

Eric Allgeiers

Dr.Frank

Dr.Amin

- Bullet point format for all of our reports
- Explain we want our bill of materials and design done by December
- Make sure everyone has at least some sort of technical task
- Make sure a copy of things gets posted to the group blog
- Deliverables accessible to everyone
- Managed to get our oscilloscope, they are very minute voltage changes
- Differential between 2 channels signal conditioner will be able to turn minute voltages to highly detectable signal, high voltage digital voltage
- SC talks to CPU and PLC
- The signals at 4 kHz
- Show parts we are looking at in presentation
- Presentation time 5:05
- Dr. Andrei and Dr. Kwan hopefully will be present, Chris to invite them
- Went to Koyo bearings, better scope. They want us to modernize their interface
- Pneumatic leaks in the system getting replacement parts. Need to find Master bearings
- Funding will be decided by Koyo, and we may get extra money from the ECE department
- Ask Koyo for extra funding, possibly get more from our engineering departments
- Our presentation will be taped
